

PF12R

The Pennant Style Flag is made from a high quality PVC Dipped Nylon Mesh. This type of mesh resists high speed fraying and water and dirt retention.

The outer trim gives a protection and smooth edge.

The 3M Yellow Reflective Material on both sides of the flag provides a good marking warning when the vehicle is parked at night.

This flag has a ½" Pocket and easily installed on any flag poles from ¼" to ½".

Excellent choice for All Terrain Vehicles, Snow Mobiles, Mobility Scooters, Bicycles and any place where a good visibility Flag may be required.
